

## **The IDO inhibitor 1-methyl tryptophan activates the aryl hydrocarbon receptor response in mesenchymal stromal cells**

### **SUPPLEMENTARY MATERIALS**

**Supplementary Table 1: A listing of the genes that were identified in the RNAseq analysis for Figure 5 to be differentially expressed upon treatment with R-MT and also by TCDD**

**See Supplementary File 1**

**Supplementary Table 2: A listing of the genes that were identified in the RNAseq analysis for Figure 5 to be differentially expressed ONLY upon treatment with R-MT**

**See Supplementary File 2**

**Supplementary Table 3: A listing of the genes that were identified in the RNAseq analysis for Figure 5 to be differentially expressed ONLY upon treatment with TCDD**

**See Supplementary File 3**
